## Sunrye™ Perennial Ryegrass

Sunrye™ Perennial Ryegrass Brand is a blend designed for rapid results in a wide range of climates. This vigorous blend has a high degree of traffic tolerance and is better adapted to compacted soils than other ryegrass blends.

Sunrye has a high shoot density with an upright growth habit. Depending on the application, recommended mowing heights are between 0.25 and 2.5 inches. Sunrye provides excellent playability on golf course tees, fairways, roughs, and sports fields with extremely fast recovery from excessive wear. Quick germination and high seedling vigor make Sunrye ideal for establishment and renovation of turfgrass areas prone to thinning as a result of high traffic. Its natural features of drought tolerance combined with dark green color equate to reduced demand for irrigation and fertilizer, resulting in cost savings.

The perennial ryegrass varieties chosen for the Sunrye blend are highly disease resistant, particularly to gray leaf spot and dollar spot. Sunrye also offers good resistance to stem rust, crown rust, red thread, and brown patch, making it an excellent choice where disease pressure can be high.

### PRODUCT FEATURES:

- Quick establishment
- Excellent traffic tolerance
- Dark green color
- Excellent disease resistance
- Excellent injury recovery
- Dense upright growth

*Sunrye™ Perennial Ryegrass is the overseeding choice at some of the best facilities including:*
